LIST OF CONTENTS FOR VOLUME 30, 2003

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 **Volume 30, Number 1** **January**

Contents

Y. Chen and P. Cheng	1	Fractal characterization of wall roughness on pressure drop in microchannels
C.C. Tseng and R. Viskanta	13	Effect of subcooling on convective melting of a particle
Q. Wan and A.V. Kuznetsov	27	Effect of non-uniformity of source vibration amplitude on the sound field wave number, attenuation coefficient and Reynolds stress for the acoustic streming
A.V. Kuznetsov, A.A. Avramenko and P. Geng	37	A similarity solution for a falling plume in bioconvection of oxytactic bacteria in a porous medium
T. Fang	47	Further discussion on the optimum temperature of efficiency of production for blackbody radiation
S.H. Hashemabadi, S.G. Etemad, M.R.G. Naranji and J. Thibault	53	Laminar flow of non-Newtonian fluid in right triangular ducts
H.-S. Li, G. Flamant and J.-D. Lu	61	An alternative discrete ordinate scheme for collimated irradiation problems
Y. Yan, X.F. Peng and B.X. Wang	71	Investigation on the transport process of flue gas desulfurization in a circulating fluidized bed
R.V.N. Melnik	83	Modelling coupled dynamics: piezoelectric elements under changing temperature conditions
J.F. Nastaj	93	A parabolic cylindrical Stefan problem in vacum freeze drying of random solids
M.J.S. de Lemos and M.S. Mesquita	105	Turbulent mass transport in saturated rigid porous media
H.-L. Lee, T.S. Wu and Y.-C. Yang	115	Prediction of unknown base heat flux in annular fin by strain measurement
B.M. Yu, J.H. Li and D.M. Zhang	127	A fractal trans-plane permeability model for textile fabrics
S.C. Haldar	139	Conjugate analysis of heat transfer from a horizontal insulated cylinder

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 Volume 30, Number 2 March

Contents

S.M.H. Sarvari, S.H. Mansouri and J.R. Howell	149	Inverse design of three-dimensional enclosures with transparent and absorbing-emitting media using an optimization technique
M. Prud'homme, T.H. Nguyen and H. Bougherara	163	Stability of convection flow in a horizontal fluid layer heated by uniform heat fluxes
T. Fang	173	New relationships for temperature sensitivity of radiation
T. Nosoko, T. Nagata, S. Gima and K. Irabu	185	An experimental study of mass transfer from fluttering flags
S.H. Hashemabadi, S.G. Etemad, M.R.G. Naranji and J. Thibault	197	Mathematical modeling of laminar forced convection of simplified Phan-Thein-Tanner (SPTT) fluid between moving parallel plates
A. Seppälä, M.J. Lampinen and M. El Haj Assad	207	A study on the zero flux approximation in convection-diffusion mass transfer problems
C.-H. Wu and Y.-L. Su	215	Optimization of wedge-shaped parts for injection molding and injection compression molding
M.C. Kim, S. Kim, B.-J. Chung and C.K. Choi	225	Convective instability in a horizontal porous layer saturated with oil and a layer of gas underlying it
R.M.S. da Gama	235	An alternative version of Planck's law and an approximation for the black-body emission in any wavelength range
R. Karwa	241	Experimental studies of augmented heat transfer and friction in asymmetrically heated rectangular ducts with ribs on the heated wall in transverse, inclined, v-continuous and v-discrete pattern
C. Balaji and H. Herwig	251	The use of ACFD approach in problems involving surface radiation and free convection
A. Ünal	261	Effectiveness-NTU relations for triple concentric-tube heat exchangers
Ö. Kaynaklı and I. Horuz	273	An experimental analysis of automotive air conditioning system
I.T. Togrul	285	Determination of convective heat transfer coefficient of various crops under open sun drying conditions

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 Volume 30, Number 3 April

Contents

H.Y. Wu and P. Cheng	295	Liquid/two-phase/vapor alternating flow during boiling in microchannels at high heat flux
M. Prud'homme and H. Jiang	303	Inverse determination of concentration in porous medium with thermosolutal convection
D.T. Lussier, S.J. Ormiston and R.M. Marko	313	Theoretical determination of anisotropic effective thermal conductivity in transformer windings
X. Xu, Y.Y. Duan, X.F. Peng and K.Y. Qu	323	Experimental study on behavior of frost crystal formation
O. Fudym, C. Carrère-Gée, D. Lecomte and B. Ladevie	333	Drying kinetics and heat flux in thin-layer conductive drying
P. Razelos and R.N. Krikkis	349	On the optimum thermal design of individual longitudinal fins with rectangular profile
H.X. Yang and Z.J. Zhu	359	Numerical study on transient laminar natural convection in an inclined parallel-walled channel
M.J.S. de Lemos	369	A block-implicit method for numerical simulation of swirling flows in a model combustor
S.-S. Chu and W.-J. Chang	379	Inverse problems in an axisymmetric multilayer annular cylinder with an interlayer thermal resistance
M.R. Islam and A.S. Mujumdar	391	Role of product shrinkage in drying rate predictions using a liquid diffusion model
W.-S. Fu and B.-H. Tong	401	Effects of eccentricity of cylinder and blockage ratio on heat transfer by an oscillating cylinder in a channel flow
A.J. Chamkha	413	MHD flow of a uniformly stretched vertical permeable surface in the presence of heat generation/absorption and a chemical reaction
E. Abu-Nada, A. Al-Sarkhi, M. Ashhab and B. Akash	423	The effect of suction boundary condition on the local and average Nusselt numbers for a free convection flow regime
A. Al-Sarkhi, E. Abu-Nada, B.A. Akash and J.O. Jaber	435	Numerical investigation of shrouded fin array under combined free and forced convection

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 Volume 30, Number 4 May

Contents

C. Ould-Lahoucine, H. Sakashita and T. Kumada	445	A method for measuring thermal conductivity of liquids and powders with a thermistor probe
Y.L. Shi, M.B. Ray and A.S. Mujumdar	455	Effects of Prandtl number on impinging jet heat transfer under a semi-confined laminar slot jet
H. Shin, K.-w. Lee, W.-s. Yoon and J. Chae	465	High pressure vaporization of burning droplet with flash vapor-liquid equilibrium calculation
K.Y. Kim, B.S. Kim, H.C. Kim, M.C. Kim, K.J. Lee, B.J. Chung and S. Kim	475	Inverse estimation of time-dependent boundary heat flux with an adaptive input estimator
S. Kim, K.J. Lee, M.C. Kim and K.Y. Kim	485	Estimation of temperature-dependent thermal conductivity with a simple integral approach
F.C.G. DeMarco, C.R. DeAndrade and E.L. Zaparoli	495	The no-slip boundary condition in the stream function-vorticity formulation using the penalty method
K. Srithar and A. Mani	505	Comparison between simulated and experimental performance of an open solar flat plate collector for treating tannery effluent
A.S. Krishnan, C. Balaji and S.P. Venkateshan	515	A synergistic approach to parameter estimation in multimode heat transfer
H.A. Attia	525	Velocity and temperature fields of a non-Newtonian fluid above a rotating disk with hall effect
H.A. Attia	535	Unsteady Von Karman magnetic flow and heat transfer considering the ion slip
V.V. Levdansky, J. Smolik and P. Moravec	545	Trapping of molecules by aerosol particles in physical and chemical deposition
S.C. Tzeng	553	Accurate prediction of friction factor and heat transfer coefficients of mixed convection in circular tubes: a simple linear algebraic model
S. Jani, M.H. Saidi and A.A. Mozaffari	565	Tube bundle heat and mass transfer characteristics in falling film absorption generators
T. Nualboonrueng, J. Kaewon and S. Wongwises	577	Two-phase condensation heat transfer coefficients of HFC-134a at high mass flux in smooth and micro-fin tubes
	591	8th UK National Heat Transfer Conference

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 Volume 30, Number 5 July

Contents

A.V. Kuznetsov and A.A. Avramenko	593	Analysis of stability of bioconvection of motile oxytactic bacteria in a horizontal fluid saturated porous layer
F. Su and R.C. Prasad	603	A transient experimental method to determine the overall heat transfer coefficient in a concentric tube heat exchanger
M.J.S. de Lemos and E.J. Braga	615	Modeling of turbulent natural convection in porous media
S.J. Matysiak and R. Mieszkowski	625	On some problems of diffusion in an isotropic half-space
K.W. Lee, J.W. Chae, J.Y. Lee and W.S. Yoon	633	Analysis of high-pressure drop vaporization with flash vapor-liquid equilibrium calculation
J.-J. Jeong, M. Hwang and Y.J. Lee	643	Single-phase flow excursion in the primary side of a vertical, inverted u-tube steam generator
H.M. Chou	653	The effect of vibration or rotation on boiling heat transfer in heating tank with different grooved pattern on its base and copper balls enclosed inside
C.D. Ho, C.L. Chang, C.K. Wang and Y.S. Su	663	Producing chilled air from ice melting with air time-velocity variations in cool-thermal discharge systems
R. Nazar, N. Amin and I. Pop	673	Unsteady mixed convection near the forward stagnation point of a two-dimensional symmetric body
M.I. Karamangil, A. Surmen and Z. Gul	683	In-cylinder expansion of ring crevice hydrocarbons in SI engines
B. Bansal, X.D. Chen and H. Müller-Steinhagen	695	Use of non-crystallising particles to mitigate crystallisation fouling
Md.I.A. Ansari, M. Sharma and A.K. Datta	707	Milk fouling simulation in a double tube heat exchanger
S.P. Anjali Devi and R. Kandasamy	717	Thermal stratification effects on non linear MHD laminar boundary-layer flow over a wedge with suction or injection
G.V.S. Sesha Girish and A. Mani	727	Analysis of forced convective evaporation system for tannery effluent (soak liquor)
T. Fang	737	General discussion on displacement law of radiation

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 Volume 30, Number 6 August

Contents

B. Yu, J.T. Han, H.J. Kang, C.X. Lin, A. Awwad and M.A. Ebadian	745	Condensation heat transfer of R-134A flow inside helical pipes at different orientations
M. Peng, S.X. Liu and L.M. Vane	755	Profiling concentration gradient in a tubular membrane pervaporation module: a modeling approach
N. Bjorndalen, S. Mustafiz and M.R. Islam	765	Numerical modeling of petroleum fluids under microwave irradiation for improved horizontal well performance
I. Quiroz, I. Herrera and D. González-Mendizabal	775	Experimental study on convective coefficients in a slurry bubble column
L.A. Dombrovsky and S.S. Sazhin	787	A simplified non-isothermal model for droplet heating and evaporation
D.G. Blinov, V.G. Prokopov, Yu.V. Sherenkovskii, N.M. Fialko, and V.L. Yurchuk	797	On efficient approximation of thermophysical fields in the heat transfer problems
M. Venegas, D. Arzoz, P. Rodríguez and M. Izquierdo	805	Heat and mass transfer in $LiNO_3$-NH_3 spray absorption system
R.H. Xiong, S.C. Wang, Z. Wang, S.C. Xu and J.X. Wang	817	Experimental investigation of mass transfer in high viscosity media
Y.-T. Lin, M.-C. Hsu and C.-T. Hsieh	825	Enhancement of the convective heat transfer for a reciprocating impinging jet flow
S.H. Chuang, J.S. Chiang and T.M. Yan	835	Numerical heat transfer analysis in a three-dimensional rectangular vent duct with heat-generating chips
S.S. Okoya, S.O. Ajadi and A.B. Kolawole	845	Thermal runaway for a reaction–diffusion equation
M.E. Sayed-Ahmed and A.S. El-Yazal	851	Laminar fully developed flow and heat transfer for Robertson-Stiff fluids in rectangular ducts with temperature dependent viscosity
S. Krishnaiah and D.N. Singh	861	Determination of influence of various parameters on thermal properties of soils
H.A. Attia	871	Steady von Karman flow and Heat transfer of a non-Newtonian fluid with uniform suction or injection
H.A. Attia	881	Steady Hartmann flow with temperature dependent viscosity and the ion slip
		6th International Symposium on Heat Transfer, Beijing, China, June 15–19, 2004

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 **Volume 30, Number 7**

Contents

S. Das	893	Pressure-velocity formulation to study the effect of protuberance on thermal convection by finite element method
D. Luo, L. He, S. Lin, T.-F. Chen and D. Gao	903	Determination of temperature dependent thermal conductivity by solving IHCP in infinite region
H. Sarac, A.A. Wragg and M.A. Patrick	909	An electrochemical mass transfer investigation in the presence of simultaneous subcoooled pool boiling
G. Buonanno, G. Giovinco and N. Massarotti	921	An elasto-plastic model of thermal contact conductance between nominally flat surface in vacuum
J.C. Elicer-Cortes, J. Tapia and M. Pavageau	931	Detection and estimation of the isotropy degree of temperature scales in a turbulent thermal plume by ultrasound scattering
L.P. Chua, J. Zhang and T. Zhou	945	Numerical study on the steady flow characteristics of proximal anastomotic models
Y.H. Kang, M.C. Kang and W.G. Chun	955	A study on thermal characteristics of the solar collector made with a closed loop thermosyphon
M.T. Hyun and M.C. Kim	965	Onset of buoyancy-driven convection in the horizontal fluid layer subjected to time-dependent heating from below
T.-C. Shih, H.-S. Kou and W.-L. Lin	975	The impact of thermally siginificant blood vessels in perfused tumor tissue on thermal dose distributions during thermal therapies
C.L. Yeh and C.T. Lin	987	Thermal contact resistance correlation for metals across bolted joints
S. Bagai	997	Similarity solutions of free convection boundary layers over a body of arbitrary shape in a porous medium with internal heat generation
M. Abu-Zaid	1005	Water fouling in natural convection conditions
K. Hooman and A.A. Ranjbar-Kani	1015	Forced convection in a fluid-saturated porous-medium tube with isoflux wall
T. Basaran and S. Kucuka	1027	Flow through a rectangular thermosyphon at specified wall temperatures
H.A. Attia	1041	Time varying rotating disk flow and heat transfer of a conducting fluid with suction or injection

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2003 **Volume 30, Number 8**

Contents

M. Vaz Jr. and E.L. Gaertner	1051	Rheological instability of polymer melt flow in circular channels
D.C. O'Mahoney	1061	A differential quadrature solution of the two-dimensional inverse heat conduction problem
S. Bielski and L. Malinowski	1071	A semi-analytical method for determining unsteady temperature field in a parallel-flow three-fluid heat exchanger
S. Shen, W. Liu and W.Q. Tao	1081	Analysis of field synergy on natural convective heat transfer in porous media
S.M. Sami and J. Comeau	1091	Impact of liquid injection on pressure drop of refrigerant mixtures inside enhanced surface tubing
F.L. Tan, C.P. Tso and P.K. Pek	1101	An experimental investigation on freckles formation during solidification of aqueous ammonium chloride
M.-H. Kim, C.-Y. Oh and D.-L. Kim	1115	Transient Marangoni-buoyancy convection in rectangular tank with phase change
P. Naphon and B. Kongtragool	1125	Theoretical study on heat transfer characteristics and performance of the flat-plate solar air heaters
N. Sukavanam and V. Panwar	1137	Computation of boundary control of controlled heat equation using artificial neural networks
S. Baskaya and E. Eken	1147	Investigation of room air flow regarding effects of occupants, inlet/outlet locations, inlet velocity, and winter/summer conditions
H.F. Oztop and I. Dagtekin	1157	Enhancement of heat transfer in a pipe with inner contraction-expansion-contraction pipe insertion
M. Yilmaz	1169	The effect of inlet flow baffles on heat transfer
O. Kaynakli, U. Unver and M. Kilic	1179	Evaluating thermal environments for sitting and standing posture
	1189	LIST OF CONTENTS FOR VOLUME 30, 2003
	1197	AUTHOR INDEX TO VOLUME 30, 2003
